DETAILED ACTION

The reply filed 3/11/05 consists of amending claims 1, 10, cancellation of claims 9, 12, 13, 16-20 and remarks related to rejection of claims.

Response to Arguments

Applicant's arguments, see page 6, third paragraph, filed 3/11/05, with respect to the rejection(s) of claim(s) 1 under MITCHELL have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of HERBERT 6,121,761.

Applicant amended claim 1 to include the limitation "...a switched capacitor circuit comprising a multiplicity of switched capacitors, wherein the in-parallel multiplicity of switched capacitors are chargeable from the power source, and the multiplicity of switched capacitors are disconnectably connected in series."

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-8, 10, 11, 14, 21 are rejected under 35 U.S.C. 102(b) as being anticipated by HERBERT 6,121,761.

Art Unit: 2836

Regarding claims 1-8, 10, 11, 14, 21.

HERBERT discloses a power source (103) providing a source of voltage;

Means for processing the source to generate an output voltage at a Vout node, wherein the output voltage varies the source voltage; and a multiplicity of energy storage devices adapted to individually controllably receive energy the Vout node (figure 7); wherein the means for processing comprises a switched capacitor circuit comprising a multiplicity of switched capacitors, wherein the multiplicity of switched capacitors are disconnectably connectable in parallel, wherein the in parallel multiplicity of switched capacitors are charged from the power source, and the multiplicity of switched capacitors are disconnectably connectable in-series.

Regarding claim 4.

HERBERT teaches a diode (Cr) and a Vh node (figure 12).

Regarding claims 5, 14.

HERBERT discloses a fast transition power supply having a source (V).

HERBERT does not disclose a battery.

A battery however, is an inherent dc source.

Regarding claims 6, 7, 8.

HERBERT discloses wherein the means for processing comprises a switching regulator comprising: an inductor; and a first switch; wherein the inductor is electrically connected between the source voltage and the Vout node, and wherein the first switch is electrically connected between the Vout node and ground (figure 12).

Allowable Subject Matter

Claims 15, 22-25 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter: the prior art does not teach or suggest a multiplicity of Vc nodes and a multiplicity of switches each electrically connected between a Vc node and a multiplicity of stimulation channels.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Art Unit: 2836

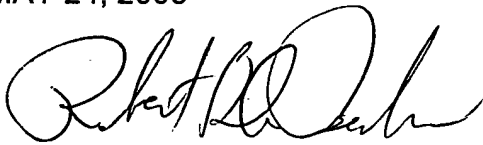

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
